Loose comfort

How To Measure

For best results, lay your product on a flat surface and flatten out any wrinkles or overlaps of fabric to ensure an accurate linear measurement.

Due to the differences if fabric composition, stretch and seam construction between your item and the Jakroo product, actual fit may slightly vary. Use this only as a general guideline.

Variances of +/- 1cm may occur between this chart and the actual product.

1IN = 2.54 CM 1CM = 0.39 IN
